### PART 3 {LEARNING A STRATEGY AND MASTERING DISCIPLINE}

- Watch **Finding the Perfect HFX Strategy**  
{<https://www.youtube.com/watch?v=mypkszfW9WI>}
- Pick a strategy to learn, Devote 1 hour a day to learning something new and 2 hours to trading on your demo account with \$1 ( 1 trading session in the morning and 1 in the evening and stick to your routine, give yourself a fixed number of trades you would be taking on each session (I stick to 3 personally, which ever number you choose shouldn't be much so you don't over trade on each session and get mentally fatigued, always record your result at the end of a trading session and at the end of the week calculate your weekly accuracy
- Each time you loose a trade try to find out why you lost the trade, Always remember they are not losses but rather lessons you are to learn from
- Keep practicing, sticking to your discipline and recording your result. When you have a monthly accuracy of 80%+ congrats you have learnt how to trade
- **And while doing all these don't miss team trading sessions and recommended Go live sessions because they would make you a whole lot of money and grow your account to 4, 5 and gradually 6, 7 figures in dollars.**
